PROVEN VALUE

For more than a decade, **Evolution** has been supplying manufacturing companies of all sizes with software applications to run their businesses more competitively. Today, evolution is a highly successful global business and recognised as one of the major suppliers of enterprise application software and B2B solutions.

Evolution is an organisation committed to ensuring that converter businesses can respond effectively to changes in the market place. Being focused on the converter sector, we understand the current issues within the industry and in particular are able to assist companies to shape and transform their business.

Evolution are able to provide a wide range of services from strategic to operational. We are unique in being able to offer a high degree of information technology expertise combined with more broadly based business transformation skills - a combination that makes us the only 'one-stop-shop' for all your business services requirements.

evolution.converter is...

e-enabled

evolution.converter is a new generation of system that is Internet ready providing e-business application integration and giving connectivity between the business's core operational systems and the web based business processes that link the elements and players within your operation. E-business technology is at the heart of evolution.converter.

Scalable

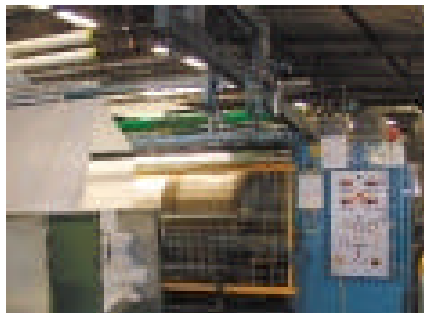

evolution.converter is the ultimate management tool for converter operations. Its scalability makes it the only product capable of supporting companies, which vary from the growing and emerging operation to the large multi-national corporation.

Guaranteed Implementation

evolution.converter is delivered pre-configured following a short analysis exercise. We determine the most appropriate system configuration with you and deliver it with draft procedures. The system is normally implemented and working in your business within 3-4 months.

Business Processes Revolutionised

evolution.converter is revolutionising traditional business practices by simplifying and compressing your business processes, giving you the benefits of lower costs and a more responsive business. It is so flexible that it can be adapted to suit your business processes - a welcome change from having to adapt your business processes to suit the system.

Converter Functionality

evolution.converter is aimed at manufacturing operations in the 'converter' business, (such as foils, packaging, metals and paper producers, as well as fabrics and cloth manufacturers), where reels, coils or bundles of raw material are converted to finished product. evolution has all the functionality expected of a fully integrated business system and contains converter industry specific functions such as:

One part number caters for multiple dimensions

- Allows one part number to be used for the product or raw material, even though it may be available in multiple widths, lengths, etc
- Avoids proliferation of part numbers for different widths, lengths, etc
- Width/length/number of items matrix enquiries display the availability of inventory in an easy-to-view format, with drill-down to selected dimensions
- Enables full traceability to be maintained, with retention of the parent lot reference on all subsequent cut/slit/finished lots

Dimensionalised Orders

Allows definition of dimensions (number of items, width, length, etc) on:

- Sales Orders
- Despatch Documents
- Purchase Orders
- Goods Receipt Notes
- Manufacturing (WIP) Orders
- Finishing Orders

Full visibility of inventory at all stages

- Retention of parent lot reference
- Lot age visibility/retention
- Lot quality/grade definition
- Core size used
- Matrix-based enquiries
- Tracking of an individual entity (reel, etc) through WIP
- Dimension adjustment within WIP
- Cutting/slit/finishing process control
- Repackaging to create different form of product
- Packaging prior to despatch
- Consolidated consignments

Online visibility of waste

Work-in-Progress and Finishing Order feedback transactions allow the recording of waste, which is then visible via online enquiries by:

- WIP/Finishing Order
- Part Number
- Work Centre
- Reason Code

Pricing Definition

- Standard widths, lengths, etc
- Supplements for short lengths
- Supplements for non-standard widths

... a cut above the rest
