

For more than a decade, **Evolution** has been supplying manufacturing companies of all sizes with software applications to run their businesses more competitively. Today, evolution is a highly successful global business and recognised as one of the major suppliers of enterprise application software and B2B solutions.

Evolution is an organisation committed to ensuring that food and drink companies can respond effectively to changes in the market place. Being focused solely on the food & drink sector, we understand the current issues within the industry and in particular are able to assist companies to shape and transform their business. **Evolution** are able to provide a wide range of services from strategic to operational. We are unique in being able to offer a high degree of information technology expertise combined with more broadly based business transformation skills - a combination that makes us the only 'one-stop-shop' for all your business services requirements.

ease.food is...

e-enabled

ease.food is a new generation of system that is Internet ready providing e-business application integration and giving connectivity between the business's core operational systems and the web based business processes that link the elements and players within your operation. E-business technology is at the heart of ease.food.

Scalable

ease.food is the ultimate management tool for food and drink operations. Its scalability makes it the only product capable of supporting companies, which vary from the growing and emerging operation to the large multi-national corporation.

Guaranteed Implementation

ease.food is delivered pre-configured following a short analysis exercise. We determine the most appropriate system configuration with you and deliver it with draft procedures. The system is normally implemented and working in your business within 3-4 months.

Business Processes Revolutionised

ease.food is revolutionising traditional business practices by simplifying and compressing your business processes, giving you the benefits of lower costs and a more responsive business. It is so flexible that it can be adapted to suit your business processes - a welcome change from having to adapt your business processes to suit the system.

Food & Drink Functionality

ease.food has all the functionality expected of a fully integrated business system and contains food and drink industry specific functions, such as:

Sales & Distribution

- Forecasting specifically designed to manage listing/delisting and promotions
- Fast order entry pad
- Dated retail selling prices
- Margin check at order entry
- Ingredient check at order entry
- Customer based 'Use by' dates
- Promotions management and pricing
- Sales Agent commission processing
- EDI Support
- Invoicing based on price at Order/Despatch/Into Depot
- Invoice produced at order entry/despatch/proof of delivery/weekly/monthly
- Van Sales support including route and load planning

Planning & Production

- Demand Planning including promotion planning
- Shelf life sensitive materials check
- Production backflush with Lot traceability
- Time slotting of supplier deliveries
- Contract/Scheduled Purchasing
- Campaigns to minimise change-over times and contamination issues

Inventory & Item Data

- Internal shelf life controls
- Food related inspection of Goods receipts
- Delivery slotting of despatches
- Waste Management
- Multiple warehouses with location bin definition
- Accrual of purchasing discounts
- Purchased & Sales consignment stocks
- Grading of Materials
