

evolution™

PROVEN VALUE

For more than a decade, **Evolution** has been supplying manufacturing companies of all sizes with software applications to run their businesses more competitively. Today, evolution is a highly successful global business and recognised as one of the major suppliers of enterprise application software and B2B solutions.

Evolution is an organisation committed to ensuring that textile and fashion businesses can respond effectively to changes in the market place. Being focused on the textile and fashion sectors, we understand the current issues within the industry and in particular are able to assist companies to shape and transform their business. **Evolution** are able to provide a wide range of services from strategic to operational. We are unique in being able to offer a high degree of information technology expertise combined with more broadly based business transformation skills - a combination that makes us the only 'one-stop-shop' for all your business services requirements.

evolution.fuel is...

e-enabled

evolution.fuel is a new generation of system that is Internet ready providing e-business application integration and giving connectivity between the business's core operational systems and the web based business processes that link the elements and players within your operation. e-business technology is at the heart of evolution.fuel.

Scalable

evolution.fuel is the ultimate management tool for fuel and lubricant blenders and distributors. Its scalability makes it the only product capable of supporting companies, which vary from the growing and emerging operation to the large multi-national corporation.

Guaranteed Implementation

evolution.fuel is delivered pre-configured following a short analysis exercise. We determine the most appropriate system configuration with you and deliver it with draft procedures. The system is normally implemented and working in your business within 3-4 months.

Business Processes Revolutionised

evolution.fuel is revolutionising traditional business practices by simplifying and compressing your business processes, giving you the benefits of lower costs and a more responsive business. It is so flexible that it can be adapted to suit your business processes - a welcome change from having to adapt your business processes to suit the system.

Fuel & Lubricant Functionality

evolution.fuel contains specific functionality for the fuel and lubricant business whether you are a manufacturer, distributor or both. It is complimentary to the standard logistics and financial functions of the evolution product.
